## DMR Digital Two-Way Radio

### Key Features

- DMR digital & legacy analogue communication modes.
- Simple controls and voice annunciation for intuitive operation.
- Advanced group calling and improved privacy.
- High capacity (1700 mAh) Li-ION rechargeable battery pack - provides over 14 hours use between charges in digital mode.
- Loud (1W) and clear audio ensures reliable communication.
- Tough and durable to survive everyday use - thanks to a polycarbonate casing and aluminium chassis.
- Pre-programmed with 32 user-selectable channels (16+16).
- Panic button for instant alerting in an emergency.
- Desktop intelligent fast charger - recharges the battery in just 4 hours.
- Sleek and slim, ergonomic design - very comfortable to carry and use.
- Weatherproof construction and sealed casing protects the radio from dust and rain (IP65).
- Motorola compatible, two-pin accessory jack for the widest choice of audio accessories.
- Two configurable dual-function side buttons to activate a range of additional features or customise operation.
- Extensive range of additional accessories - including headsets, microphones, carry cases, chargers and more - to enhance operation and suit your own operating requirements.

### About the Opus D6

Designed to deliver reliable voice communications in a range of tough environments and DMR digital radio features, the **Opus D6** is an all round high performer.

### Why choose the Opus D6?

Many users want to start migrating towards digital two-way radio but find the cost prohibitive. The **Opus D6** solves this problem. Despite being highly affordable, it delivers all the DMR functionality that users require - and since it's also backward compatible with legacy analogue systems, you can start migrating today - fully switching to digital when you're ready.

### Rugged & Reliable

The robust, high quality casing is IP65 rated - able to overcome the effects of dusty atmospheres and direct water jets. The **Opus D6** keeps going in tough workplace environments.

### Flexibility

When your users, workplace or application have specialist requirements, the **Opus D6** is supported by a wide range of quality accessories to meet your needs.

### What is Opus Digital?

The **Opus D6** adopts the DMR Tier II digital radio standard. This is the UK's most popular digital radio specification, meaning that the **Opus D6** can communicate with MOTOTRBO™ radios and other DMR compatible models.

DMR improves the quality of your voice communications, most noticeably when you reach the range limits.

Uniquely, it also allows two different conversations to take place simultaneously on the same conventional radio channel.

Another benefit of this leading technology is a reduction in battery consumption - making batteries last longer.

### Emergencies

The orange 'panic button' will instantly send an alarm signal to a designated group of users.

Display equipped radios can immediately determine who is in distress.

### High Performance

The **Opus D6** delivers loud, clear audio and a very impressive communication range.

In digital mode, the high capacity 1700mAh Lithium Ion rechargeable battery pack delivers more than 14 hours use between charges and a longer life battery is also available as an option.

### Opus For The Future

The **Opus D6** already employs the latest radio technology.

When new or additional features and enhancements are made, the radios firmware can be upgraded by your supplier, securing your investment in **Opus** digital radios.

### Everything you need - all in one box!

Radio body with compact high-performance antenna, 1700 mAh Li-ION battery pack, Desktop fast charger, UK Power supply, Belt clip, Easy-to-follow UK instructions.
