

Advanced Two-Way Radio with Worker Protection

Key Features

- Simple controls and voice annunciation make operation intuitive.
- High capacity (1700 mAh) Li-ION rechargeable battery pack - provides over 12 hours use between charges.
- Loud (1W) and clear audio ensures reliable communication.
- Tough and durable to survive everyday use - thanks to a polycarbonate casing and aluminium chassis.
- Pre-programmed with 16 user-selectable channels.
- Man-down alarm built-in, with audible radio I.D.
- Panic button for instant alerting in an emergency.
- Advanced signalling for integration with other devices e.g. Opus RSU1
- Desktop intelligent fast charger - recharges the battery in just 4 hours.
- Sleek and slim, ergonomic design - very comfortable to carry and use.
- Weatherproof construction and sealed casing protects the radio from dust and rain (IP65).
- Motorola compatible, two-pin accessory jack for the widest choice of audio accessories.
- Two configurable dual-function side buttons to activate a range of additional features or customise operation.
- Extensive range of additional accessories - including headsets, microphones, carry cases, chargers and more - to enhance operation and suit your own operating requirements.

About the Opus T6

Designed to deliver reliable voice communications in a range of tough environments and provide advanced worker protection features, the **Opus T6** is an all round high performer.

Why choose the Opus T6?

When you need a higher quality product with great performance, advanced features and a range of workforce protection features the **Opus T6** should be your first choice.

It's the perfect and affordable choice for any organisation that has lone worker monitoring obligations or wants to provide an additional layer of workforce protection and alerting.

Rugged & Reliable

The robust, high quality casing is IP65 rated - able to overcome the effects of dusty atmospheres and direct water jets. The **Opus T6** keeps going in tough workplace environments.

Flexibility

When your users, workplace or application have specialist requirements, the **Opus T6** is supported by a wide range of quality accessories to meet your needs.

Man-Down Protection

Should a worker fall, trip or lose consciousness the **Opus T6** will detect that it is no longer upright. This will activate a countdown timer and audibly alert the user. If the radio remains 'down' when the timer expires, an alarm signal is sent to other **Opus T6** users. They will receive an alert and the affected users I.D. will be verbally announced.

The orange 'panic button' will instantly activate the alarm signal and a lone-worker timer is also available as an additional protection measure.

A range of external devices, such as autodiallers, can also be activated automatically in these emergency situations.

High Performance

The **Opus T6** delivers loud, clear audio and a very impressive communication range.

The high capacity 1700mAh Lithium Ion rechargeable battery pack delivers more than 12 hours use between charges and a longer life battery is also available as an option.

As standard, the **Opus T6** is preset for use with an Ofcom *Simple UK licence* - a great value, off-the-shelf radio licence. However, for users that require additional flexibility radios can be configured to operate on most private business radio channels.

Opus For The Future

As your requirements develop the **Opus T6** can grow with you.

For example, the **Opus T6** can be integrated to operate with alarm systems, autodiallers and other devices to provide multiple levels of staff security and protection.

Shown Actual Size

Everything you need - all in one box!

Radio body with compact high-performance antenna, 1700 mAh Li-ION battery pack, Desktop fast charger, UK Power supply, Belt clip, Easy-to-follow UK instructions.
